

TWIN MOONS - INFORMATION SHEET

Ancient Egypt (KMT) Series - Dendara Light & Djed Pillar

Regardless of who's timeline you subscribe to in terms of the 'Age' of the Egyptian civilisation & many of its wonderful constructions (ie the Great Pyramid of Giza, the Sphinx, etc), it is clear that they (or a predecessor civilisation that predates the Old Kingdom) possessed technology. The evidence is clear if one only looks.

The first example that many think of is the so called 'Dendara Light' depicted in several murals on the walls of the Dendara temple of Hathor. - see Pic1. This is written off as purely symbolic, just as the supporting segmented pillar - See Pic3), a 'Djed' is thought to represent stability & refers to the God Ptah.

Pic 1 - Single Dendara Light with Djed Pillar

Of note are the representation is a non-Human with 2 directional or tuning fork like devices. When seen in 3 dimensional aspect, these could be cone shaped (refer Michael Tellinger research in Southern Africa for various references to cone shaped sonic technology).

TWIN MOONS - INFORMATION SHEET

What is often not shown are the other representations of the 'Dendera Light' as shown in Pic2, where 2 'opposing' lights are shown, only one of which is supported by a Djed pillar.

Pic 2 - Dual Dendara Lights with a single Djed Pillar

TWIN MOONS - INFORMATION SHEET

My contention is that these are devices of slightly different types working in concert with a single Djed resonator (more examples of these pillar designs in Pic 4 & 6). The purpose I suggest is not simply to produce light, but to generate directed Electromagnetic fields - now referred to as 'Scalar fields'.

Pic 4 - Various Djed Pillar representations (note 'wires' on 1 & 4)

The Djed pillars come in various types & sizes, however as shown in Pic4, they all share the same functional elements (4 toroidal rings wrapped around a core pillar), often with generally 2 resonators at the top - see Pic 7 (that generate/transmit a specific EM frequency).

I suggest that the toroidal rings are actually wire-wrapped inductor coils (as found in all electrical generators today) - see Pic5.

TWIN MOONS - INFORMATION SHEET

To generate electricity all that would be needed is a core pillar of magnetised mineral or Iron) & copper Coils that rotate.

Pic 5 - Typical toroidal induction coils

These pillars & their frequencies/transmissions have been mistaken as being worshipped (as thought to be illustrated in Pic6), however these are I suggest actually being 'used' by those who understand their purpose as in Pic7.

TWIN MOONS - INFORMATION SHEET

Indeed Pic7 shows the Djed pillar device being used & aimed at a particular target, every pillar device clearly showing these 2 resonators on their top.

Pic 7 - Djed Pillar 'devices' complete with dual resonators (see arrows)

Why aren't these being investigated - because to do so means acknowledging that the accepted timeline of history (a linear progression) is overly simplistic & should be a cycle of progress & decline.

It's interesting to think about isn't it.
