### Fibonacci Sequence - As Above So Below

Our Universe is built on a collection of Guidelines (never rules ☺) that All creator beings know & understand implicitly. I would like to speak of one of these Universal guidelines today - the "Fibonacci Sequence".

**What is this** - a numeric sequence found in all aspects of natural growth. This sequence starting at 0 (zero), followed by 1, then each successive step in the sequence being a number created by adding the previous 2 numbers together, so we get - 0, 1, 1, 2, 3, 5, 8, 13, 21, 34, 55, 89, 144... and so on.

**Why is this important** - it corresponds with the axiom "As Above So Below". When plotted graphically these numbers create what is known as a Fibonacci Spiral. The Atom aligns with this sequence, naturally grown second density plant & animal life aligns, our Solar System aligns, our Galaxy aligns, and so on.

As energetic beings, our own subtle body structure aligns with this sequence. As does our subtle bodies toroidal fields (commonly known as our auric fields).

**Why would this happen** - we are unique aspects of the One Infinite Creator & we have a fractal nature which also aligns with this sequence. By definition, we can extrapolate that this is also an aspect of the Infinite Creator - "Ultimate One".

As creators, we built this universe upon building blocks that we knew intimately. A natural pattern that is core to who we are & how we are fashioned as infinite beings. We used the tools closest at hand - so we could see the Infinite Creator in every corner of this creation.

**Do you know what else is interesting** - since we started seeing fluctuations (increases) in Earth's Schumann Resonance frequency, I decided to plot decade based peaks starting at 7.83Hz (let's approximate an 8 for whole number plotting) as measured by Schumann himself in 1952.

This remained constant until the nineties, when variations started to be registered (a 9Hz in 1996). In 2006 a peak Schumann resonance of 13.8Hz was detected, then a peak of 21.1Hz in 2012 - giving us approximate alignment with 8, 13 & 21 (7th, 8th & 9th elements in the sequence).

## TWIN MOONS - INFORMATION SHEET

### What do you see -

1. Schumann resonance increased from 9 in 1996 (when we can estimate more significant changes were happening) to 13 in 2006 (10 years).
2. The next major jump in Schumann resonance to 21Hz was in 2012 (only 6 years).

The rate of change is increasing - as Gaia transition continues to pick up pace.... Interesting 😊😊

## TWIN MOONS - INFORMATION SHEET

**The Fibonacci Sequence  
in Nature**

Leonardo Fibonacci (c. 1170–1250) was an Italian mathematician who introduced the Fibonacci sequence to the Western world. The sequence is a series of numbers where each number is the sum of the two preceding ones, starting from 0 and 1.

**Fibonacci Sequence**  
**0, 1, 1, 2, 3, 5, 8, 13, 21, 34, 55, 89...**
