

TWIN MOONS - INFORMATION SHEET

Earth & Solar System Cycles - Part 3

Energetic Changes, Density Changes - Update

In this update to the 3rd installment in my Solar System Change Cycles series, we will look at these changes from an Esoteric, Consciousness, & Personal changes perspective, including more details relating to the Procession of the Equinoxes, Mayan End-Times & Stories of Energetic Activation, the Harvest & Ascension.

The **first** point to keep in mind, is that these are natural cycles of change that have always occurred in this (and many other) Solar Systems. Their impact on 3 dimensional physical life varies in direct proportion to the Energetic nature of the change (when seen as part of a progression of cyclic energetic changes), which supports Evolution of Consciousness.

The **second** and far more important individual understanding relates to the impact and opportunity that this change represents for **YOU** personally. If you can entertain the idea that we have chosen to incarnate at this time to be of Service during these times of change (and also experience this pivotal evolutionary event), then you will see these changes through your personal lens/filter as something you **CHOSE** to experience.

These events don't happen **TO YOU**, they are being provided **FOR YOU** to support YOUR INDIVIDUAL GROWTH (along with every other entity on the Earth/Gaia) & change is good for your growth/development..

As RA says - **"The Conditions that bring about Harvest are of no consequence"**. This update also includes important aspects relating to what RA refers to as becoming fully **"Crystalised"**.

TWIN MOONS - INFORMATION SHEET

The 'Great Year' Cycle

As most would be aware, the year 2012 represented for the Mayan Culture the end of a cycle of time that the Mayans recognised as a 'Great Year', which coincided with the end of the Mayan 'Long Count' calendar. Regardless of what Hollywood Movies wish to illustrate, this did not represent the 'End of the World' from a Mayan perspective - but the end of one Cycle & beginning of another.

It seems likely that the ancient Mayans possessed well developed knowledge of celestial mechanics, along with many centuries of carefully recorded stellar observations, as their 'Great Year' duration (26000 years) coincided closely with a natural cycle of movement known as the "Precession of the Equinoxes".

TWIN MOONS - INFORMATION SHEET

A few scientifically proven facts:

- The Earth is travelling through space along with the SUN in a helical spiral..
- Due to Axial tilt & a natural 'wobble' that this tilt generates as Earth travels through space, Earth aligns with a different constellation (or house of the Zodiac) every 2160 years.
- A Full cycle see's Earth travel through all 12 Zodiac houses – This is what the Mayan's call a "Great Year".
- A "Great Year" is measured as 12×2160 years = **25920** years.

Science calls this the "Precession of the Equinoxes", which aligns quite accurately with the duration of the "Great Year" ascribed by the Mayans (26000 Years).

The End of the Mayan "Long Count" calendar - a "Great Year", indicates the end of an Age (what the Hindu's call a "Yuga").

This is a time of **Change, Rebirth & Ascension** according to the Mayan's.

TWIN MOONS - INFORMATION SHEET

According to the Indian Vedic traditions, we are moving out of a period of 'Darkness' known as a 'Kali Yuga', which symbolises a period of difficulty, troubles, challenges & extreme events (both naturally occurring & man made), where conflict/war is a major focus for growth & evolution of Consciousness.

As you will note, these Yuga's are defined as a progression of Upward & Downward progressing cycles ranging from Gold to Silver, Bronze & Iron ages, which have various durations.

In terms of alignment between the Mayan & Vedic cycles - the year 2012 is thought to align with the approximate end of the 2nd phase of the Kali Yuga (Iron Age) on the **bottom of the Yuga cycle** (ending the 2400 Kali Yuga period) and noted as the end of the Piscean age (2160 years). While measuring its phases as different durations than the 'Procession of the Equinoxes' - 24,000 years v's 25,920 years, this variation is not consequential in cosmic terms.

TWIN MOONS - INFORMATION SHEET

Law of One - 3 Cycles of Harvest (Major Cycles)

From RA's perspective as outlined in the "Law of One" materials, the 'Great Year' cycle is referred to as a "Major Cycle", and is a part of a grander cycle of Consciousness Evolution, comprising 3 Major Cycles (Law of One, Sessions 6.14-15, 9.4, 20.27, 22.14).

RA states in 6.15 - *"One major cycle is approximately twenty five thousand [25,000] of your years. There are three cycles of this nature during which those who have progressed may be harvested. At the end of three major cycles - that is, approximately between seventy-five and seventy-six thousand (75-76,000) of your years - all are harvested regardless of their progress, for during that time the planet itself has moved through the useful part of that dimension and begins to cease being useful for the lower levels of vibration within that density."*

With this in mind, it is interesting to contemplate whether this Major Cycle we find ourselves experiencing is the 1st, 2nd or 3rd cycle within the grander 3-cycle sequence of Density progression. RA indicates that this is the 3rd in the cycle, however the important point to focus on is - **our own work** as we approach the transition point of this Major Cycle itself (often referred to as '**The Event**') & becoming **Crystallised**.

TWIN MOONS - INFORMATION SHEET

The physical (3D) manifestation of this Event is a **Micro-Nova** or **Solar Flash** event. (See previous 2 papers for details regarding these solar system wide changes).

<https://twinmoons.net/wp-content/uploads/2019/09/Twin-Moons-Info-Earth-Solar-Cycles-pt1.pdf>

<https://twinmoons.net/wp-content/uploads/2019/09/Twin-Moons-Info-Earth-Solar-Cycles-pt2.pdf>

We need to exploit any and every opportunity to attain greater **Balance** leading to the time of this Nexus (so as to increase the likelihood of progression to the next Density, rather than to repeat the cycle of 3rd Density lessons). This is extremely important, as the Solar Event is the visible manifestation of parallel waves of energy existing across multiple (if not all) dimensions in the Space-Time/Time-Space continuum. This extra-dimensional energy operating outside linear time is here NOW, causing changes to all aspects of our Mind, Body & Spirit complex - resulting in **Crystallisation** in the fully balanced individual..

Crystallisation & Crystal Chakras

RA's descriptions as outlined in the "**Law of One**" materials, refers to a fully polarised & balanced individual as being fully 'Crystallised'. While it is not expected that individuals are fully crystallised by the time of the peak energetic Event, some degree of crystallisation (and hence Balance) is essential. RA's use of language is very specific and often multi-layered. In this context, we can observe that the act of attaining balance of & between CHAKRAS results in a specific change & attunement of the Chakras to new energy spectra (wave length/frequency of light) so as to anchor one's mind/body/spirit complex in the Higher frequency ranges denoted by 5D Earth (Gaia). This metamorphoses actually changes our 7 Chakras into Crystal form (starting with the Root Chakra).

Why is this essential - ***"the New Earth energies are anchored via the Crystalline Grid - and so must WE."***

Just as 3D Earth is overlaid by 5D Earth, so are our Mind/Body/Spirit complexes, anchored via overlaid Chakra sets along the Prana Tube. These Crystal Chakras evolve as part of the Inner work we do to Balance. In addition to organic crystallisation manifested through exposure to these transformative energies, "Crystal Chakra" acceleration protocols are also available, having been transmitted/unlocked by several Wanderers over the past decade. For more specific information on these protocols, please contact **Sitara Lightbringer, John Mann** or myself (**Sean Murray**) at Trinity Stars, Temple of Stars or Twin Moons (websites listed at the end of this update).

TWIN MOONS - INFORMATION SHEET

The “New Earth”, 5D Earth, 5D Gaia Concept

One of the most discussed elements in modern Esoteric literature relating to these times of change, is the evolution (or creation) of a ‘New Earth’ or 5th Dimensional Earth, that will provide the Energetic environment to support Humanity (Us) as we step into the next phase of our evolution (moving into a higher state of Consciousness).

Frequently discussed by Barbara Marciniak (in her channelling of the Pleiadians), Dolores Cannon (Founder of Quantum Hypnosis Healing Technique - QHHT) in her book “The Three Waves of Volunteers and the New Earth”, as well as the RA transmissions of the “Law of One” by L/L Research - the establishment of a ‘New’ Earth at an elevated Energetic state is a fundamental aspect of these changes.

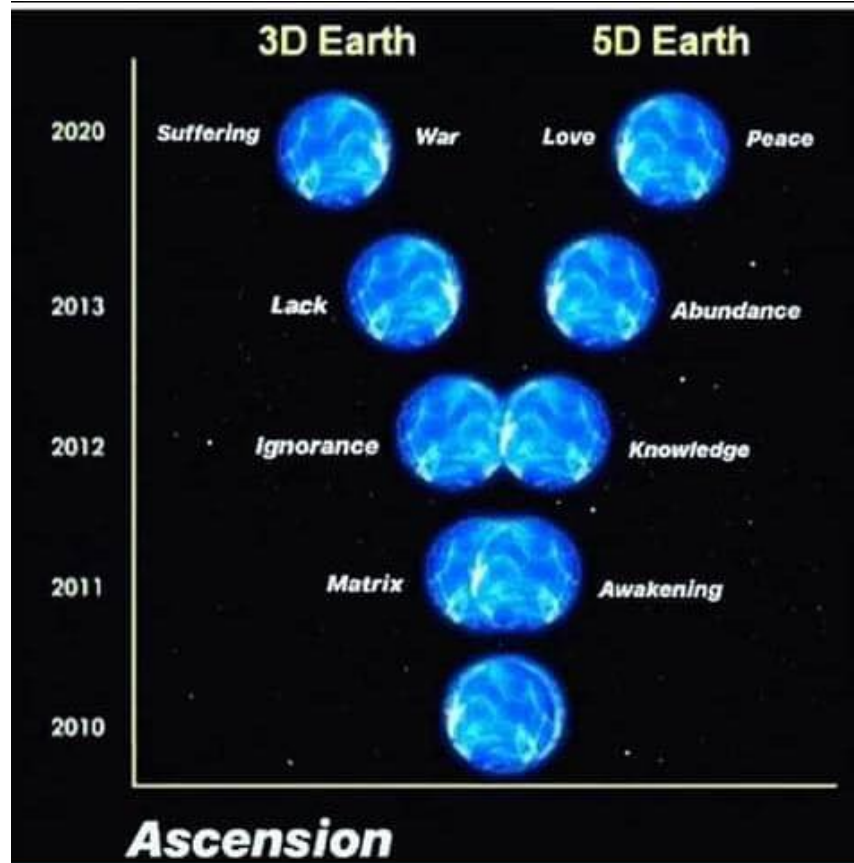

It is thought that this 5th Dimensional world (5D Earth or simply Gaia), exists at this very moment in parallel to the 3rd Dimensional Earth, separated Energetically but essentially occupying the same “Space”, and that after the major Energetic event (“The Event” or Nexus) thought to climax with a “**Solar Micro-Nova**”, that a divergence (or Bifurcation) will occur. This will provide an opportunity for Humanity to perceive these higher frequencies & to energetically move to this new Earth if desired (although many will experience these energies leading up to this event to a greater and greater extent through their level of **Crystallisation**).

TWIN MOONS - INFORMATION SHEET

Whether this 5D Earth actually exists is (in my opinion) less important than how we go about preparing for the energetic changes that I believe are already under-way & going to reach a peak on this planet in the near future. I often fall back on core logic here - "So, what are the consequences of bringing about changes in my life that support this picture of greater Balance?"

As I see it there are only 2 possible alternatives:

1. I put in the effort & embrace the self-work to bring about a more balanced life; however the Earth changed **DON'T** Occur.
2. I put in the effort & embrace the previously mentioned self-work, and the Earth changes **DO** Occur.

In either case - I have improved my life, hopefully the lives of those around me & prepared for changes if they occur - **no wasted effort!!**

I could always choose NOT to put in the effort - but that leads to Self-Service - which is **Not My Path**.

For understandable reasons, **dates are completely unreliable** - so I suggest that one does not give much credence to anyone who states a specific time-frame emphatically. **Reaching the Event in our lifetime**

TWIN MOONS - INFORMATION SHEET

though is likely! However, indications are that a convergence of “Minimum EM field strength” & Grand Solar Minimum, with Galactic Super wave or Galactic Current Sheet transition is a likely trigger.

Will we have any pointers or signs of the “Event”?

There are several likely signs leading up to this event, amongst the most likely being associated with the movement of the Earth’s Magnetic Poles & the related decline in Magnetosphere field strength. Remember the Earth’s Magnetic field has been declining in strength steadily, since it peaked in the 1600’s (interestingly coinciding with the *Maunder Minimum*). This rate of decline has greatly accelerated in recent years to now be between 5% & 10% EM strength loss per decade.

It should be noted that independent readings of EM field strength taken in Queensland, Australia from **September to November 2019** (2 months) saw a mean field strength reduction from **81.5uT** (Micro-Tesla’s) to **78uT**. This shows an accelerating reduction in the region of **~4.3%** in that 2 month period*.

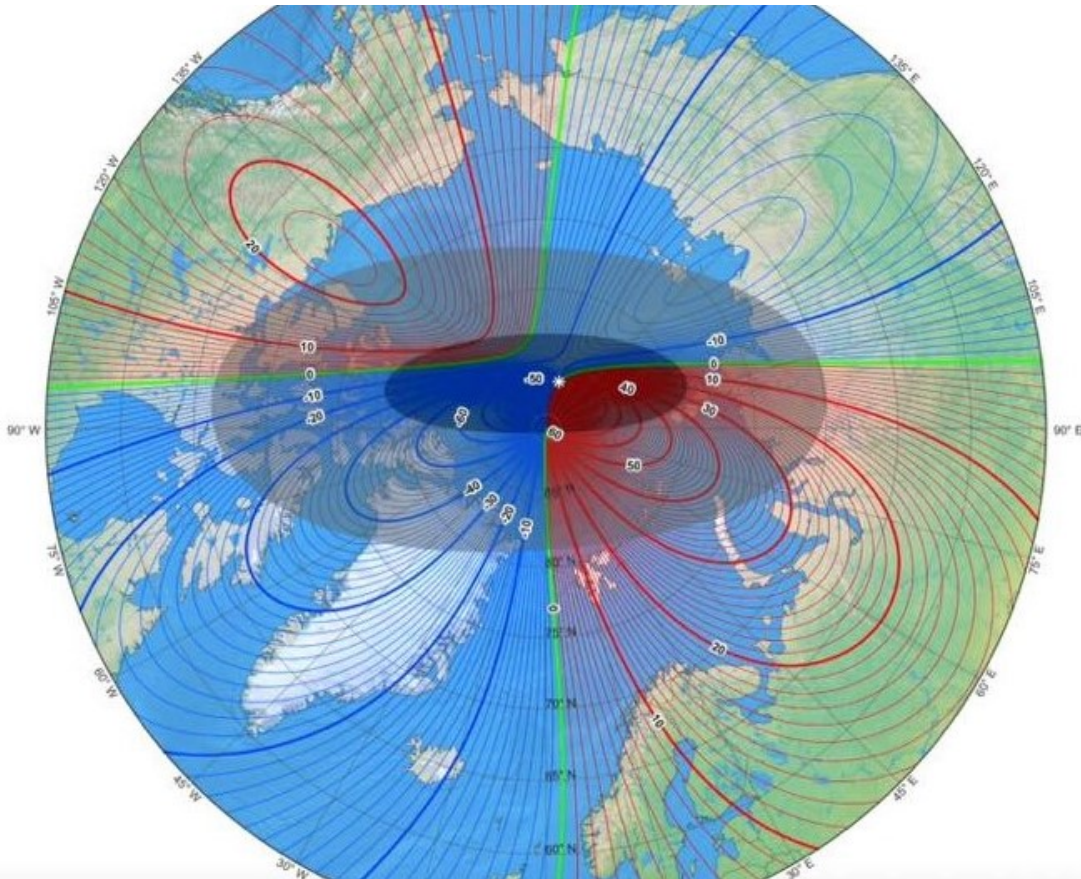

It is believed by modern science that when the EM field intensity drops to **~10%** of maximum, that the final Shift or Excursion will occur. *

Of particular note is current theory relating to an acceleration “tipping point” possibly reached when the poles reach the EM Weak field lines (at approximately 40degrees North/South Latitude), in **~ 20 years**.

©Universal Copyright 2020 is authorized here. Please distribute freely as long as both the author [Sean \(Twin Moons\) Murray](#) and www.TwinMoons.Net are included as the resource and this information is distributed on a non-commercial no charge basis.

TWIN MOONS - INFORMATION SHEET

The dipole nature of the magnetic fields is such that 2 North & 2 South polar fields actually exist (with the North gaining in strength over Siberia, while it quickly declines over Canada). The South Pole is moving steadily into the Southern Ocean to the West of Australia & are likely related to the creation of the extremely low EM intensity anomaly situated near Argentina (East of South America), known as the South Atlantic Anomaly**.

TWIN MOONS - INFORMATION SHEET

As can be noted, as the Magnetosphere intensity declines, so the Cosmic Ray count reaching ground level (via Neutrino count) is shown to be increasing.. Of particular concern in terms of these cycles of natural change is the rapidly approaching 'Grand Solar Minimum', which is likely to occur at or around Solar Cycle 26-27 according to Dr Valentina Zharkova of Northumbria University (Solar cycles are 11 years long).

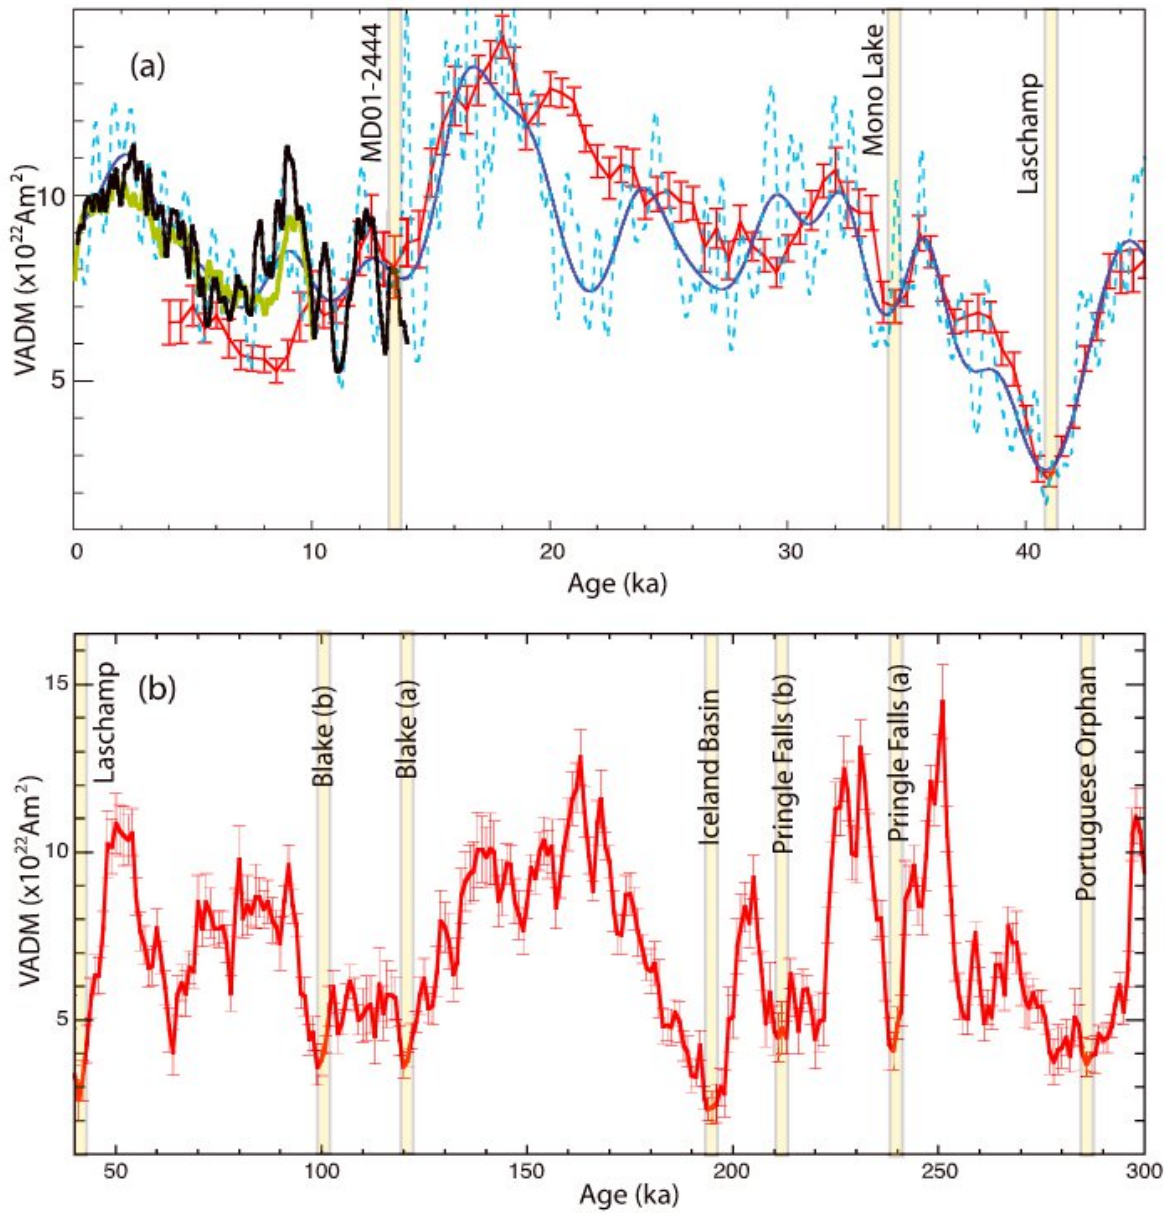

©Universal Copyright 2020 is authorized here. Please distribute freely as long as both the author [Sean \(Twin Moons\) Murray](#) and www.TwinMoons.Net are included as the resource and this information is distributed on a non-commercial no charge basis.

TWIN MOONS - INFORMATION SHEET

How often do these Magnetosphere Pole shifts (or more frequent Excursions of 45° +) happen?
Research into sediment samples & magnetised specimens indicate changes happen approximately every ~ 12 k years, with 3 of the last 4 excursions verified (MD01-12kya, Mono Lake- 34kya, Laschamp--42kya).

So by all accounts we are due for one now.

TWIN MOONS - INFORMATION SHEET

While I hesitate to provide dates - as this is an ENERGETIC event (subject to reaching a peak energetic & vibrational nexus point, not according to any clock), it is clear that these changes are governed by natural & organic processes.

I suggest that we look to the Fibonacci Sequence for guidance here & refer readers to my paper on the Schumann Resonance & Fibonacci Sequence for more information.

<https://twinmoons.net/wp-content/uploads/2019/09/Twin-Moons-Info-Schumann-Resonance-Explained.pdf>

<https://twinmoons.net/wp-content/uploads/2019/09/Twin-Moons-Info-Fibonacci-Sequence.pdf>

When will Grand Solar Minimum occur? - Approximately **22-26 years** from now (2020), between Solar Cycles 26/27. When may Earth's EM field minimum occur - accelerating after reaching the Weak Field lines in 20 years (when it is projected to be at 50% of max strength), possibly resulting in EM field loss of ~10% per year (instead of decade) - **24 years** to reach 10% of max strength. Does this align with Solar Minimum?

How Bad will it get here on Earth during the Tipping Point of the 'Event'?

In terms of the physical conditions we are likely to encounter, it is important to understand that in this dimension the behaviour of Energy is directly analogous to Electromagnetic field behaviour (after all, this is an Electro-Plasma-Magnetic Universe). The goal being to attain Energetic or Electrical **Balance**.

The amount of Energy that is involved in this change in Earthly/Gaian terms (magnitude of disruption) is directly proportional to the Energy differential (ie: **Potential Difference - PD**) between states.

Where does this energy that contributes to a Earthly Potential Difference (**PD**) come from - **Us**.

We exist in a vibrational relationship with the planet (remember our entrainment to the Schumann Resonance). When we are imbalanced, this manifests as a disruption in one or more Energy Bodies. The Earth receives this imbalance by way of her Symbiotic relationship with all of us. This creates Energetic imbalance in **HER** Energy Bodies.

We contribute to the EM state of the planet (**PD**), via our Negative Thoughts, Actions & Collective/Individual misalignment (that can be described as 'Our level of **Balance** or **Imbalance**').

How can the Earth/Gaia resolve this Imbalance? By discharging the sum stored Potential Difference (**PD**) - via **Tectonic Activity, Atmospheric discharge, Storms, EM field changes**., etc. RA refers to this as a 'Heat' build-up, which is described as needing to "go Somewhere" & likely to cause "Kinetic movement" (Tectonic Disruption).

This time it seems that the likely disruption will be quite severe - however it is important not to unduly focus on the Physical 3D conditions - as Fear itself will reduce your Vibrational Frequency (thus increasing your own Potential Difference, which you can think as resistance to be overcome).

This clearing is a necessary step for Gaia as well as ourselves.

TWIN MOONS - INFORMATION SHEET

What will it be like?

First & foremost - this will be a personally unique & possible quite variable experience.

There are many opinions on this point, however the following viewpoint has been distilled from a great number of sources, where I have looked for commonality & consistency (without implied plagiarism).

- Imagine, you are going about your day. The news has been worrying of late, so you limit the amount you digest of this (as it seems to be very fear inducing). You rely heavily on your intuition daily & often see things around your “Appear & Disappear” - Organic things seem to appear & artificial disappear.
- You have been keeping an eye on the state of the Magnetosphere strength (which has continued to decline in recent years, nearing 10%) and the Magnetic Pole’s movement, seeing that these are moving quicker & quicker towards each-other in preparation of the suggested meeting point somewhere in South Asia (likely near Indonesia).
- Next you note Aurora displays even where you live. If your country is facing the Sun indirectly, you note a strong flash of Super-Bright light peripherally (if you caught this directly then eyesight may well be compromised). If your country is facing away from the Sun, you see a massive increase (a pulse) of intense Aurora filling the sky.

©Universal Copyright 2020 is authorized here. Please distribute freely as long as both the author [Sean \(Twin Moons\) Murray](#) and www.TwinMoons.Net are included as the resource and this information is distributed on a non-commercial no charge basis.

TWIN MOONS - INFORMATION SHEET

At this point (over the next 7-10 minutes, which is how long all the various wavelengths of light travelling at Super/Sub-luminal speed will take to fully reach Earth), it is suggested that an intense personal experience will be felt. Time will appear to subjectively stop, and a dream like state may be entered.

- Those who have prepared or are naturally in a well balanced state will feel a sense of calm/peace along with possible excitement.
- Those who have not done the internal work or prepared will enter an extremely agitated state, likely fear inducing.

Over a personally determined period of time, individuals may become aware of an intense inner white/gold light (not dissimilar to the residual image you can experience when looking at a bright light for too long, then close your eyes).

This light is considered to be a component of a natural activation process/sequence, which may be described as somewhat meditative in nature. Over the next minutes (or even hours) individuals will experience a uniquely personal spiritual/consciousness experience. Those with greater Balance & hence Crystalline Chakras will be capable to perceiving higher wavelengths/frequencies of light.

Ultimately this part of the experience will be unique to yourself.

It is thought that, subject to ones personal level of Energetic Balance & ability to comprehend/interpret higher and wider frequencies of vibrational energy (light), a corresponding opening/blossoming of perceptions & consciousness understanding will occur. This experience is only bounded by ones own individual ability to perceive & understand/wonder.

For some (balanced energetically) may experience a permanent & lasting change (activation) as a by-product of this experience. Their perception range will extend into vibrational ranges that allow them to perceive “New Earth” energies & even to physical structure not previously ‘Seen’.

This is thought to be through a Crystallisation & permanent change to the 7 Chakras themselves, thus permanently changing their operant energetic frequency range. This is referred to as attaining the Crystal Chakra state.

At this point, a number of accounts (particularly those of QHHT clients) indicate that these individuals who have been activated begin to comprehend various higher vibrational frequency aspects, such as:

- Luminous / alternate landscapes overlaying the 3D landscapes.
- Individuals may be making a journey on a bridge (or similar) or appear to be more in/on the luminous landscape than the 3D one.
- Normal 3D landscapes & aspects may seem more ‘Dim’ or washed out in colour compared to the 5D.

©Universal Copyright 2020 is authorized here. Please distribute freely as long as both the author [Sean \(Twin Moons\) Murray](#) and www.TwinMoons.Net are included as the resource and this information is distributed on a non-commercial no charge basis.

TWIN MOONS - INFORMATION SHEET

Individual choice is strictly supported via Free Will, with some feeling drawn to help others to 'Step onto the bridge' or 'move to the Bright landscapes, before making their journey, while it seems that others cannot see these new vibrational wavelengths - hence do not believe any such exists.

Another aspect that appears to have changed is the subjective experience of time. Many will seem to feel time is somehow 'slower', while others experience this as normal transition of time.

What follows these Energetic changes?

From a 3D perspective, this is a 2 step process, where this energetic flash is the first component, to be followed by the physical impacts stage. In this second stage, the Earth will be impacted by the Sun's outer shell of particles (impactors) that will arrive some 10-14 hours after the initial high energy flash.

The kinds of damage that can result from such impacts are documented in the 2nd installment in the Solar System changes series.

<https://twinmoons.net/wp-content/uploads/2019/09/Twin-Moons-Info-Earth-Solar-Cycles-pt2.pdf>

What we can expect likely during this same 10-14 hour window are extremes of Tectonic activity, high intensity winds & possible local to extreme inundation of landmasses world wide.

No one can clearly define the degree of damage likely (as this is subject to the amount of Balancing required by Earth/Gaia), however a moderate to high amount of action is likely.

©Universal Copyright 2020 is authorized here. Please distribute freely as long as both the author [Sean \(Twin Moons\) Murray](#) and www.TwinMoons.Net are included as the resource and this information is distributed on a non-commercial no charge basis.

TWIN MOONS - INFORMATION SHEET

How can I achieve Balance (thus activate Crystal Chakras & Anchor to 5D Earth)?

When looking at personal Balance, this should be considered in energetic terms. We need to focus on balance Meta-Physically, Emotionally, Consciously & Intellectually in terms of thoughts, actions & deeds.

Our thoughts shape our reality & influence others (whether we are aware of it or not). Positive thoughts held for long enough make us feel better & influence our overall vibration positively.

Will any of us achieve perfect Balance - **No**. Perfection is not required - just the attempt to be as balanced as we can.

Steps to take to attain greater balance:

- Build Meditation into your daily life as an activity just as important as sleeping. Make time for it, value it, understand why to do it. Whether you are aware of it or not, this will raise your vibration (providing opportunity for your higher consciousness aspects to highlight where work needs to be done & even what to do).
- Be more Service to Others. This needs one to sit firmly within their sovereignty while giving service (not to be lesser or subordinate to any one else, but equal in all things).
- Honouring all Other-Selves Free will
- Be more conscious of emotions and seek to reduce reactionary thinking or Triggering.
- Exploring my own shadow aspects, with an aim to understand them, learn from them, be mindful of my reactions, accept who I and what I have done & integrate these learnings into myself as strengths rather than weaknesses. With an aim to “be better”.
- Forgive myself & others (through understanding). This does not mean forget or discard the learnings associated.
- Be kind to yourself & all Other-Selves. Kindness leads to kindness - it is catching.

The main point to achieving greater Balance is to be in a position to optimise your state of Consciousness such that at the time of the Event you do not need to repeat another Major Cycle in 3rd Density.

Remember, just be reading this & being open to new insights (using your discernment), energies are doing their work - the Crystalline seed of your Root Chakra is already in place (at the very least) - greater Balance will grow this & your other Crystal Chakras.

TWIN MOONS - INFORMATION SHEET

What if this view is wrong?

Many may have difficulty accepting the grander implications outlined in this article, in which case “what if we are wrong?”

I will address this in the following points:

- Firstly, everyone has absolute free will in terms of what they choose to accept - please don't simply take my word (or anyone else's) that this is gospel. I (and those other sources) may be wrong - whether we believe this is likely to occur or not.
- Secondly, If I am wrong, then all I will have done is focus on what I see as a set of actions to increase my personal **Balance** as previously outlined. These can be considered to be positive actions in any case.
- I will not have violated any one else's free will nor hopefully incurred any Karma by extension.

However, in an Infinite Universe - there is always the possibility that we are correct.

Blessings All

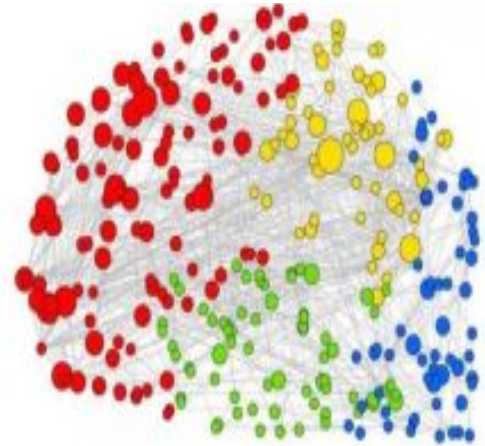

In Service
